Date of Birth: 88-11-17

Joel Bohman

Education

2007– **Master of Science in Computer Science and Engineering**, *KTH*, Stockholm, .
Preliminary date for examination is spring 2012.

2004–2007 **Upper secondary school**, *IT-Gymnasiet Sundbyberg*, Stockholm, A specially designed programme with focus on IT and Natural Sciences.

Relevant Experience

2011– **Software Consultant**, *Apparelrow*, Stockholm.
Consulting on a startup based in Stockholm. My work consists mainly of web development in Python and Javascript using technologies such as Django, jQuery, Apache Solr and RabbitMQ.

2011– **Founder**, *Firma Joel Bohman*, Stockholm.
I started my own software consulting company in June 2011.

2011 **Open Source Developer**, *Google, Python Software Foundation*, Telecommuting.
Participated in Google Summer of Code 2011 for the umbrella organization Python Software Foundation. My work was to port the web framework Pyramid from Python 2.x to Python 3.x and resulted in a Pyramid 1.3 release.
More information: `https://github.com/Pylons/pyramid/wiki/Python-3-Porting`

2010 **Software Developer**, *AAA Lifestyle*, Stockholm.
Worked as a software developer with PHP/Drupal and MySQL for the AAA Lifestyle project.

2010 **Software Developer**, *DataStax (formerly Riptano)*, Telecommuting.
I developed a web based log management system in Python using Apache Cassandra as the database backend. My work was done as a proof of concept used for demostration purposes.
